My Profile

I'm a User Experience Designer eager to learn, explore, research, collaborate, create and develop the next future digital experiences. I have 2+ years Art Direction and Visual Design experience across agency/in-house roles, so I know how to make things look good, and tight timelines don't scare me. I work well in a team and independently. I am excited about building digital solutions that serve a range of user needs, because technology is a tool that should make people feel empowered.

“I build future **digital experiences** for users with **diverse preferences.**”

My Experience

Remote Design Consultant

📁 Naranjo Designs 📅 Jun 2019 - present

As a design consultant, I add value to this team by introducing accessibility audits and provide design advise for websites and brand work. I create low fidelity wireframes, interactive prototypes, visualisation elements, and pitches for new business.

Freelance Designer

📁 Self-employed 📅 Dec 2018 - Jun 2019

Created and completed design projects in the following areas: Websites, identity branding, billboards and social banners for advertising campaigns, and email newsletters for digital marketing. A notable project was working with the UX and production team at Dynatrace where I worked on Low/High Fidelity wireframes and prototypes for their website redesign.

Art Director Intern

📁 Weber Shandwick 📍 Detroit, USA 📅 July 2018 - Nov 2018

Worked with Creative Directors, Copywriters and Video Producers to conceptualise and implement existing and new client campaigns. Worked on accounts for General Motors, APTIV, Delphi Technologies, and Priority Health. I added value to the team by creating the logo for the EcoCar Mobility Challenge and infographics for General Motors.

My Tools & Apps

📁 Sketch Xd Ps Ai iOS Android Apple Microsoft VIVE

My Education

MSc. User Experience Design

📍 Kingston University London 📅 2020

BSc. Graphic Design

📍 Southern Adventist University 📅 2017
